APPROVAL & COMPLIANCE

Catch supplier and factory risk before it costs you, with our Approval & Compliance solutions

Risk hides in the gaps between spreadsheets, emails and audits

Approval, certification tracking and audit management too often live in disconnected spreadsheets and inboxes. A lapsed certificate or an unflagged factory change can turn into a failed audit, or a recall, before anyone notices. Foods Connected's Approval & Compliance solution puts supplier and factory onboarding, certification, audit and inspection on one platform, built to catch non-conformance before it becomes an issue.

70,000+ suppliers already on the platform

250k+ specifications managed

Every supplier approved. Every site compliant. Proof, whenever it's needed.

Connected approval, certification and audit data means issues are caught early and proof is always to hand, from first onboarding to the final audit.

Risk caught early

Non-conformance flagged the moment a certificate lapses or a supplier or factory changes, not after the recall.

Always audit-ready

Every approval, certificate and inspection record lives in one place, ready for any auditor, any time.

Faster supplier approval

Onboard new suppliers and factories in days, not months, on a two-sided network built for food.

Less manual chasing

Automatic renewal and review alerts remove the spreadsheet-and-email chase for expiring certifications.

Approve, monitor and prove compliance, in one place

One platform covers the full approval workflow: onboard suppliers and sites, track certification, run audits and inspections, and keep it all structured and ready to report.

✓ **Supplier & site approval**	Structured onboarding workflows that qualify suppliers and sites against risk-based criteria before they ever ship.
✓ **Two-sided supplier network**	Join 70,000+ suppliers already connected, so suppliers are onboarded once and reused, not re-keyed for every customer.
✓ **Certification tracking**	Every certificate, standard and accreditation tracked in one place, with automatic expiry and renewal alerts.
✓ **Audit & inspection**	Plan, run and record supplier and site audits and inspections, with corrective actions tracked through to close-out.
✓ **Regulatory compliance**	Stay ahead of tightening regulation (EUDR, BRCGS, GFSI), with compliance data structured and ready to report.
✓ **Self-serve**	Build approval workflows and forms with the form builder.
✓ **Reporting & automation built in**	Live dashboards and automatic alerts replace manual spreadsheet chasing.
✓ **Enterprise-ready integration**	ISO 27001 certified, built to connect with existing systems, with proven ERP integrations.

From data to confident supplier compliance decisions:

1 Onboard

Bring suppliers and sites onto one platform with structured, risk-based approval workflows.

2 Track

Keep every certificate, standard and accreditation current, with automatic expiry alerts.

3 Audit

Plan and record audits and inspections, and track corrective actions through to close-out.

4 Prove

Show compliance on demand with live dashboards and structured, report-ready data.

> ***It's a great tool to have, easy to use and alerts me to deadlines for closeouts of non-cons, allowing me to send gentle reminders to suppliers.***
