FOODS CONNECTED

PLM, RISK & COMPLIANCE SOFTWARE

Your product lifecycle. One connected platform. Less risk, from source to shelf.

Risk hides in the gaps between disconnected systems

Specs, suppliers and quality data too often sit in spreadsheets, email and point tools, re-keyed at every handoff with no single view. A lapsed certificate or an undeclared allergen can become a recall in a day. Foods Connected connects every product and supplier, from source to shelf, so you spot risk earlier and resolve it before it reaches the shelf.

100+ of the world's leading brands trust Foods Connected

70,000+ suppliers already on the platform

Safer products, faster to shelf, at lower cost.

One connected view of every product and supplier, so you can see risk, cost and readiness before they reach the shelf. Backed by 98% gross retention, sustained over 10 years.

Protect your brand

Catch a lapsed certificate or allergen issue before it becomes a recall. The average recall costs $1m, before the headlines.

Stand up to any audit

Walk into any audit or retailer review with proof to hand. Finnebrogue: zero failed audits since implementing.

Get to shelf faster

Approve suppliers in days, not months. One customer launched a 200+ ingredient factory with no extra headcount.

Protect your margin

Cost and risk in one view. Sourcing on the platform averages 3 to 6% annual savings, without added risk.

FOODS CONNECTED

PLM, RISK & COMPLIANCE SOFTWARE

Take risk and cost out of your product lifecycle operations

One connected platform, across the entire product lifecycle. Each solution area helps your food business eliminate risk and cost, from source to shelf.

Approval & Compliance

Every supplier and site safe to buy from, before it reaches your brand.

Food Safety & Quality

Problems stopped before they reach the shelf, with 40% faster audit prep.

NPD & Specifications

Specifications, formulation and labelling, under full revision control.

Sustainability

Claims you can back and global regulations you can meet.

Procurement & Sourcing

Tendering and open-book costing, with supplier performance connected.

Built on a connected foundation

One platform that connects your suppliers, your teams and your existing systems, so the data you act on is current, structured and trusted.

✓ **Supplier network**

70,000+ suppliers keep their data current, so you get fresher information with less chasing.

✓ **Self-serve**

Your teams shape their own templates and workflows, with no coding and no IT ticket.

✓ **Integrations**

ISO 27001 certified, with APIs into your ERP and master data. Works with the systems you already run.

From idea to shelf, with risk managed at every stage:

1

Launch right

One current spec, linked to supplier data, so allergens and labels are right before launch.

2

Approve suppliers

Approve new suppliers and sites in days, not months, with certificates tracked.

3

Protect margin

Cost and negotiate on live data and consolidate spend. 3 to 6% average annual savings.

4

Prove it

Quality, audit and sustainability evidence ready for auditors, retailers and regulators.

> ***Using Foods Connected has allowed us to drive standard processes across our business, helping capture data in a consistent way, meaning the analytics allows us to easily see comparable performance on any level.***
