FOODS CONNECTED

SUPPLIER AUDIT MANAGER

Supplier Audit Manager helps you be ready for any audit, any time

An audit trail scattered across inboxes isn't an audit trail at all. Supplier and factory audits too often get planned in one system, recorded in another, and chased up by email, which means corrective actions stall and the evidence an auditor actually wants is never in one place when you need it.

Supplier Audit Manager connects audit planning, scoring, findings and corrective actions on one platform, **so you're ready for any audit, any time.**

85% average increase in annual audit completion

40% average annual time savings

Fewer failed audits, less last-minute scrambling

When audits, findings and corrective actions live in one place, nothing falls through the cracks before the auditor arrives.

Always audit-ready

Every audit, finding and corrective action lives in one place, ready for any auditor, any time.

Closed-out corrective actions

Findings tracked through to resolution, not left open in an inbox.

Faster audit cycles

Plan and schedule audits against risk, not a generic annual calendar.

Full visibility

See audit status and outstanding risk across every supplier and factory, at a glance.

Every audit, from scheduling to sign-off, in one place

Supplier Audit Manager brings audit scheduling, scoring, findings and corrective actions together in one connected workflow.

✓ **Audit planning & scheduling**	Plan supplier and factory audits against risk-based criteria, not a fixed calendar.
✓ **Audit scoring & findings**	Record findings and scores directly against the audit, with evidence attached.
✓ **Corrective action tracking**	Every finding tracked through to close-out, with automatic follow-up.
✓ **Two-sided supplier network**	Suppliers submit evidence and respond to findings directly on the platform.
✓ **Connected to approval & certification**	Audit results link straight back to supplier approval and certification records.
✓ **Self-serve**	Build your own audit templates and scoring criteria with the form builder. No IT resource or ticket required.
✓ **Reporting & automation built in**	Live dashboards and automatic alerts replace manual spreadsheet chasing.
✓ **Enterprise-ready integration**	ISO 27001 certified, built to connect with existing systems, with proven ERP integrations.

A connected flow from audit to close-out

1

Plan by risk

Plan supplier and factory audits against risk-based criteria, not a fixed calendar.

2

Score and record findings

Record findings and scores directly against the audit, with evidence attached.

3

Track every corrective action

Every finding is tracked through to close-out, with automatic follow-up.

4

Close the loop with suppliers

Suppliers submit evidence and respond to findings directly on the platform.

> ***"Foods Connected has allowed us to easily digitise all of our internal factory auditing across multiple sites, allowing us to drive improvement, standardisation and visibility."***
